

Penguin Chests

Print on heavy card stock in cream or white.

(1) Cut 8 lengths of fine string, each one about 23 cm long. Tie each length in a loop.

Cut out all the penguin chests. Punch holes at the dark spots on backs of the penguin chests.

Attach a string loop to each white penguin chest using the hole in the back.

Make sure the knot in the string is near the hole in the back so that when the blue bodies are glued over the hole, the knot gets hidden under the paper.

(2) Fold up wing and align blue armpit to middle of body line. Brush glue on the upper portion of the white penguin chests & stick the blue body/wings on so that the hole and knots are covered, with the string loop poking out the middle of the blue back.

(3) Glue pink feet to penguin ankles. Glue pale blue cheeks to penguin faces.
